Part-Time

Posting Detail Information

Position Summary

The [Transplantation Immunosuppressive Pharmacology Research Program](#) (TIPRP) in the Department of Pharmacy Practice at the University at Buffalo (UB) is seeking a **Clinical Research Coordinator** to support the multidisciplinary research program in clinical pharmacology research of immunosuppression after kidney transplantation in collaboration with the UB-MD Nephrology Division at the Erie County Medical Center. The Clinical Research Coordinator will provide coordination for the TIPRP program and provide research tracking expertise to support the clinical pharmacology studies that includes providing accurate, efficient record keeping of collected specimen and management of the data obtained through these studies with administrative responsibilities in quality assurance.

Job Duties may include the following:

- Coordination and interface of the clinical research functions that include: study kit preparation; development and updates of standard operating procedures; quality assurance of research procedures and data.
- Coordination, submission of annual reviews and modifications of clinical studies to the University at Buffalo Institutional Review Board (IRB).
- Training and supervision of graduate, post-graduate and professional students relative to clinical study preparation, quality assurance and data entry management.
- Maintain the operation, qualification and calibration of laboratory equipment and facilities.
- Professional and effective communication with team members and collaborators regarding work related issues. Notify appropriate personnel, in a timely fashion when problems, delays, potential hazards and instrument malfunctions arise.
- Attend and complete training and certification sessions per the requirements of the TIPRP and the university.
